The band was brought from Manila for the inauguration of President Taft. It was brought here by Taft's Yale friends and classmates to give a concert tonight. The members were assigned to rooms in the Arlington and retired. This morning when the three named were called they did not respond, and investigation disclosed that gas was flowing freely into their room. Other members of the band said that since they came to this country they have stopped at hotels in which there was only electricity, and that they were not familiar with the methods of operation of the gas and playfully turned it on and off as they had done to the 119% electricity in Washington. At the New Haven Hospital this noon it was said that all three were improving and would undoubtedly recover.

In all my twenty-two years' experience as a successful Washington builder I never saw an instance where the "knocker" was much of a fac-tor. The "knocker" may be annoying (like a fly or a wasp). but beyond this he amounts to nothing. In fact, I believe in encouraging competition, for the building field is broad and big. Just now the outlook is very attractive, and I think every good builder in Washington should be very busy. In the meantime give me a chance on your estimating.
